- Objective:** A position as a web developer giving me the opportunity to work with a team and help the company grow in a positive direction.
- Education:** **City College of the City University of New York** – New York, New York  
**Fall 2005 – Spring 2010**  
B.S., Computer Science
- Work Experience:**
- uSkinz.com** – Forest Hills, New York  
**July 2008 – Current**  
*Owner & Developer*
- uSkinz.com is a company I created, dealing with screen protection for electronics such as the Apple iPod, iPhones, etc...
  - I initially created an eBay store and uploaded products to the company store on eBay. I created and designed a matching online store from scratch, implemented an ecommerce solution to generate a 60% increase in sales.
  - Developed a SEO campaign for both the eBay store and online store to further heighten the awareness of the company and its products, which generated an increase of 150% in unique visitors to the website.
- New York General Contracting Corp** – Forest Hills, New York  
**July 2007 – April 2008**  
*Graphic Designer*
- Made daily updates to company website, like adding pictures for clients to view company's work, therefore generating more customers for the business.
  - Created and designed all graphical work, editing images, creating brochures and booklets to heighten awareness about the company.
  - Performed computer related tasks such as posting company's service ads on CraigsList, send out multiple fax, email customers, call potential customers, and worked closely with the manager on customer service relations.
- Projects:**
- Blogging** – TheBlogJoint.com  
**April 2006 – Current**  
*Blogger*
- Theblogjoint.com is a technology news, reviews and guides blog. It has been steadily growing with 300 RSS subscribers and 400 page views daily, and regularly makes monthly ad revenue through various sources.
  - This blog is run on wordpress blogging content management system, and uses a custom designed template to work on the latest version of wordpress.
